Retail Sales, Customer, and Operations Analysis

Identifying trends in a retail dataset

By Chime Chidinma Sylvia

PROBLEM STATEMENT

Despite having access to detailed sales, customer, product, store, employee and returns data, retail businesses may struggle to convert this information into actionable insights. There is a need to analyze available data to uncover patterns and performance gaps across sales, customers, products, stores, employees, discounts and returns. The findings will help management understand the key drivers of revenue and profitability and make informed decisions that improve customer retention, operational efficiency, sales performance, and overall business growth.

OBJECTIVES

- To evaluate the key drivers of revenue and profitability.
- To identify top performing products, categories and stores.
- To evaluate sales volume, order activity, and costs.
- Examine customer composition and value.
- Analyze product return patterns

INSIGHTS

- Electronics generates the highest revenue at approximately 34M.
- Clothing contributes approximately 11M.
- Both categories generate approximately 5M in profit showing that higher revenue does not necessarily translate into proportionally higher profit.

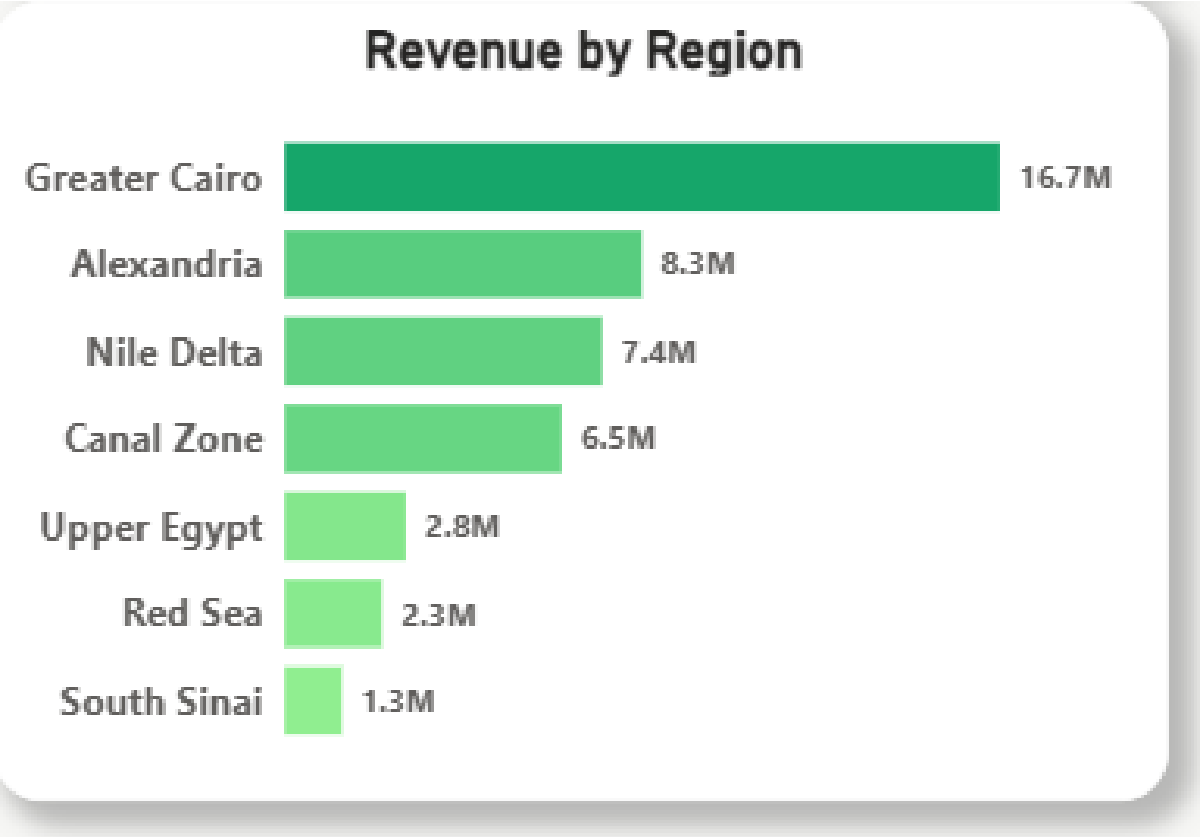

INSIGHTS

- Revenue fluctuates considerably across the year.
- October records the highest visible monthly revenue at approximately 4.3M while the lowest points occur around April and November at approximately 3.3M
- Sales patterns vary by month and should inform planning.

INSIGHTS

- Greater Cairo leads revenue generation at approximately 16.7M.
- Alexandria and Nile Delta follow at approximately 8.3M and 7.4M.
- Revenue is concentrated in a few major regions.

INSIGHTS

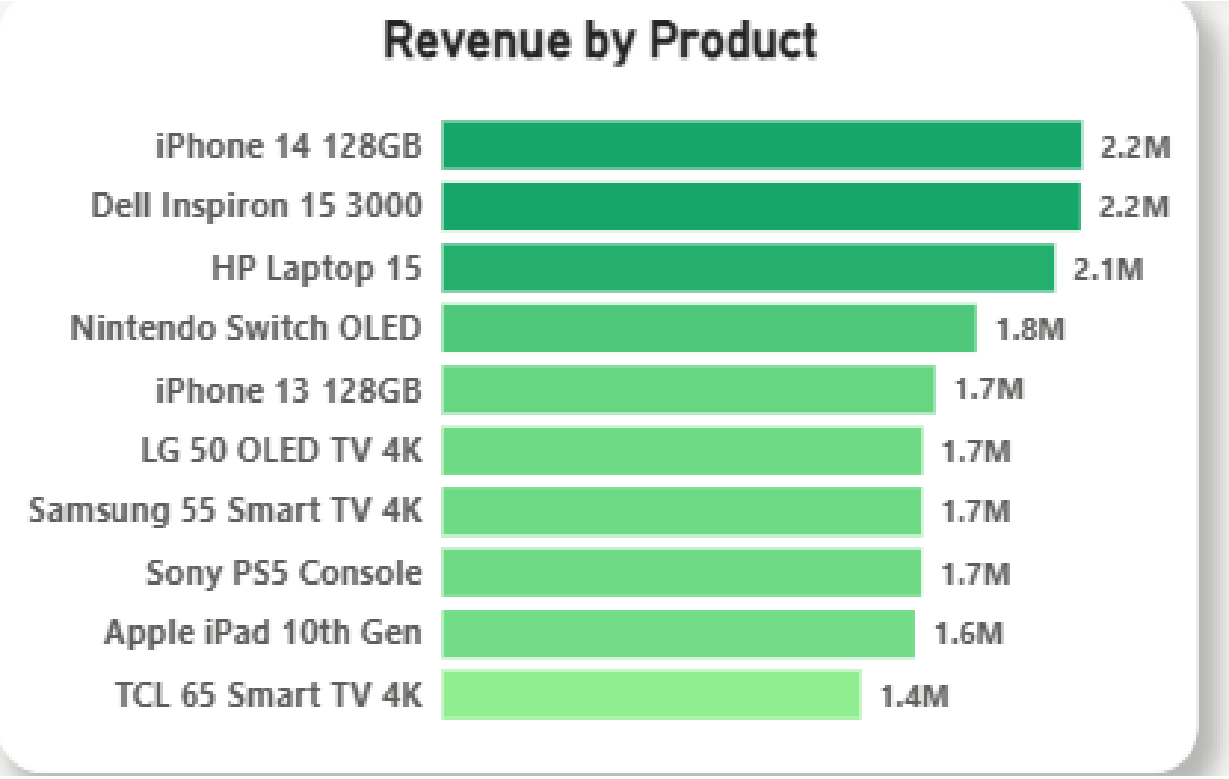

- **Greater Cairo generates the highest revenue and absolute profit of approximately 3.63M.**
- **Upper Egypt has the highest displayed profit margin at 22.1%.**
- **The highest-revenue region is not necessarily the most efficient by profit margin.**

Regional Performance

Region	Total Revenue	Total Cost	Total Profit	Profit Margin
Upper Egypt	2,829,136	2,204,320	624,816	22.1%
South Sinai	1,320,701	1,048,700	272,001	20.6%
Red Sea	2,270,526	1,809,720	460,806	20.3%
Nile Delta	7,414,450	5,819,030	1,595,420	21.5%
Greater Cairo	16,706,829	13,080,420	3,626,409	21.7%
Canal Zone	6,476,891	5,106,310	1,370,581	21.2%
Alexandria	8,332,447	6,579,650	1,752,797	21.0%
Total	**45,350,979**	**35,648,150**	**9,702,829**	**21.4%**

INSIGHTS

- **Technology products dominate the top revenue positions.**
- **iPhones, Dell, HP, Nintendo, LG, Samsung, Sony and Apple products are among the leading contributors.**
- **A relatively small group of products contribute significantly to revenue**

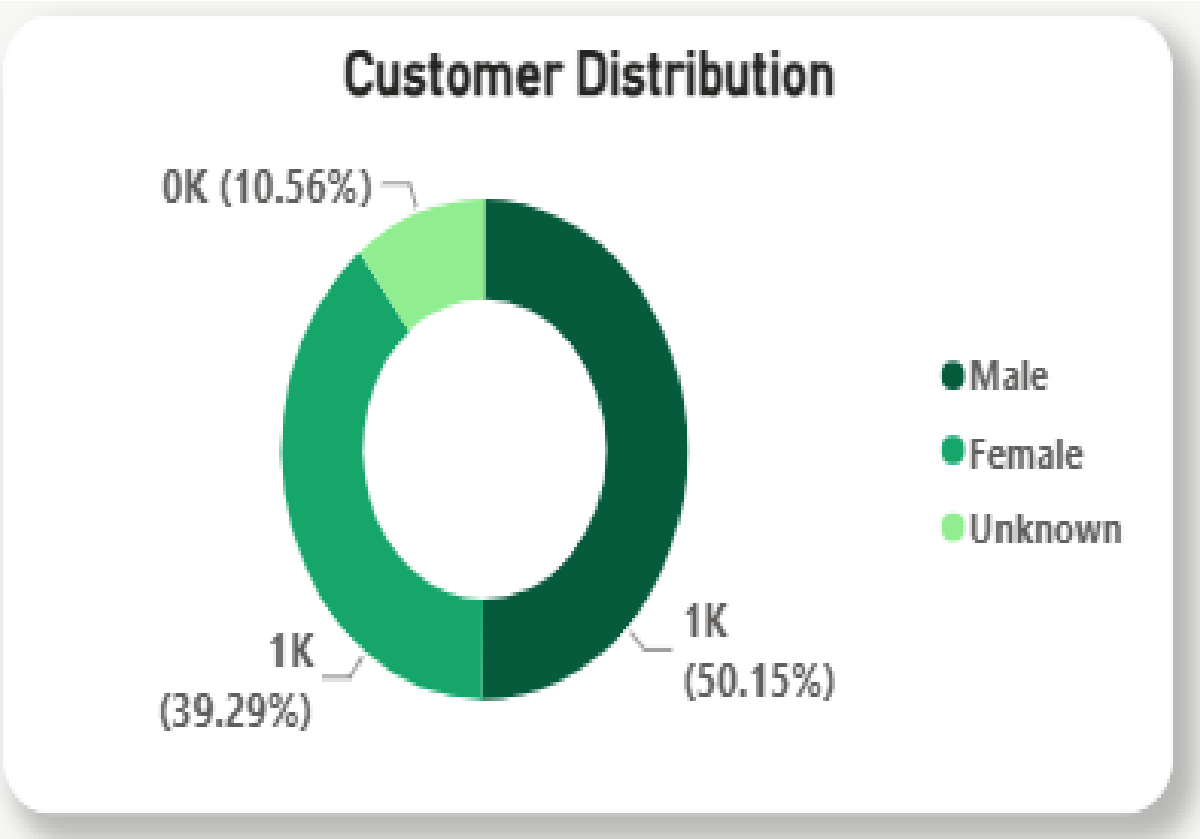

INSIGHTS

- **Lotus Cairo festival city store has the highest displayed store profit at approximately 0.34M.**
- **Lotus city star store follows at approximately 0.26M.**
- **Store profitability varies significantly by location.**

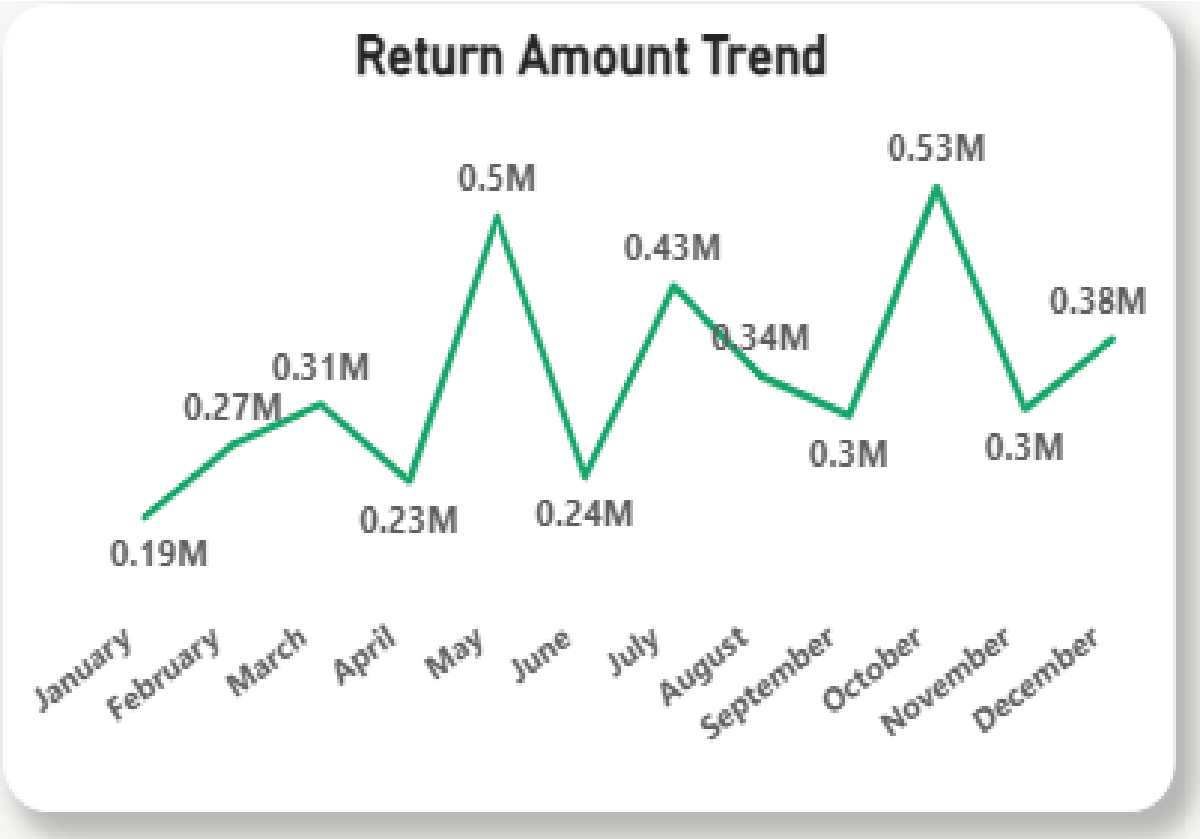

INSIGHTS

- Male customers represent 50.15% which indicates that the customer base is slightly male-dominated.
- Female customers represent 39.29%.
- Unknown category is 10.56% showing that gender information is not available for all customers.

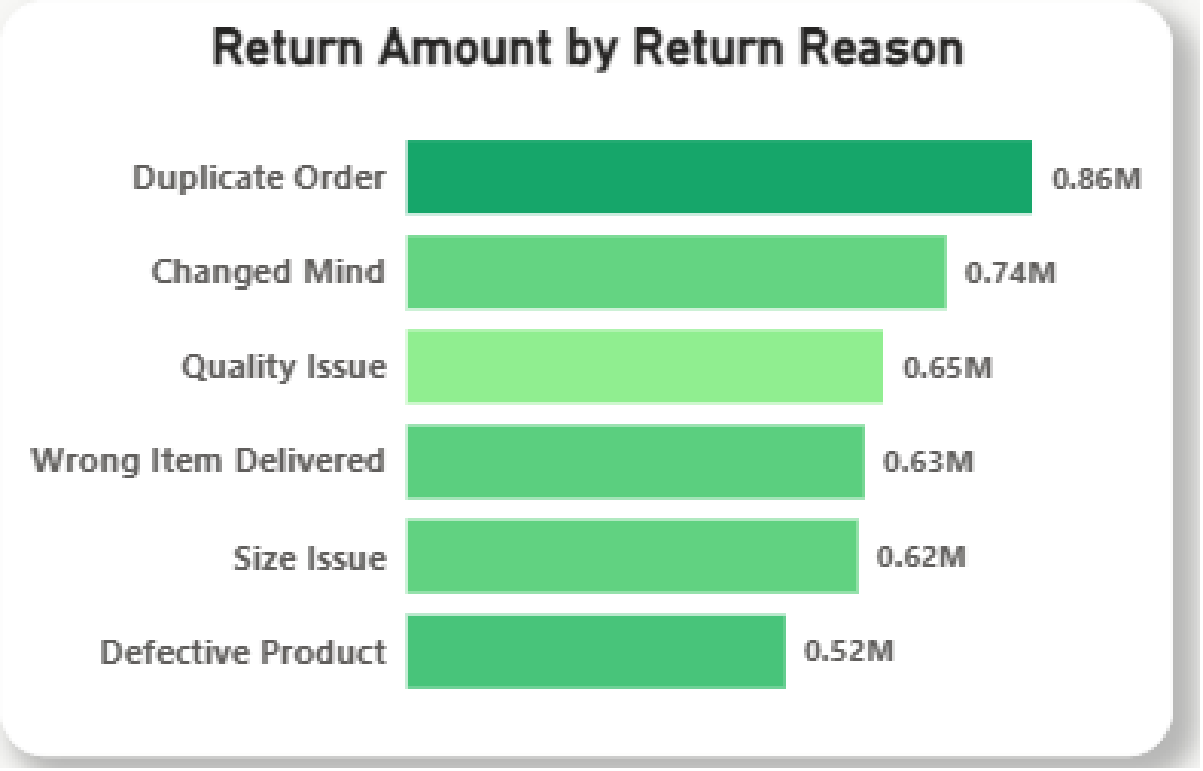

INSIGHTS

- Return amounts fluctuate considerably throughout the year.
- October records the highest displayed return amount at approximately 0.53M.
- Return activity varies by month and should be monitored alongside sales trends.

INSIGHTS

- **Duplicate Orders generate the highest return amount at approximately 0.86M.**
- **Changed Mind follows at approximately 0.74M.**
- **Quality Issues and Wrong Item Delivered contribute approximately 0.65M and 0.63M.**

POLICY RECOMMENDATIONS

- Strengthen Return Management
- Improve Profitability and Cost Control
- Optimize Pricing and Discount Strategies
- Strengthen Customer-Focused Strategies
- Use Data-Driven Operational Planning
